### Shell Script

Aim:
To write a Shellscript to test given year is leap or not using conditional statement

Program:

```
echo "Enter a year: "
read a
m = `expr $a % 4`
if [ "$m" -eq 0 ];
then
echo "Leap Year"
else
echo "Not a leap year"
fi
```

enter number
12
leap year

Result:

Enter a Year:

2024

LEAP YEAR

A program is executed in shell script to display leap year

23
